Congratulations!

Your account has been provisioned with \$5,000 in credits.

These credits won't be displayed in your just yet. Consider this email as confirmation that the credits have been successfully applied to your account.

FAQs

This document contains frequently asked questions and a detailed list of the products included in the Startup Program. Below is some key information to help you get started:

Questions	Answers
What should I do now?	Your best next step is to upgrade to enterprise to access more features for free: As a Cloudflare for Startups Program member, you get access to three (3) Enterprise domains at no cost (these do not reduce your credits). To upgrade a domain: 1. Log into your Cloudflare Dashboard. 2. Under "Websites," select the domain you'd like to upgrade. 3. On the "Overview" tab, scroll to "Active Subscription" and click "Change" next to your current plan. 4. On the next page, select "Enterprise" and confirm the upgrade. This ensures you fully leverage your Enterprise-level benefits.
When do the credits expire?	You have up to one year to use these credits. They will expire either once they're fully used or at the end of the 12-month period, whichever comes first. One year from the date of this email, your account will graduate from the program. <u>Mark this date in your calendar so it doesn't catch you by surprise.</u>
Where can you see Your Credit Balance?	Currently, Cloudflare's dashboard does not display credits, we plan on adding more visibility for credits in the future. Instead, you can track your balance through your invoices: • When your usage generates an invoice for usage-based products (e.g., Argo, R2), the remaining credit balance will be displayed in the top left corner of the invoice.

	- The total amount deducted from your credits will be shown in the bottom right corner of the invoice. - Please note that some products do not use the credits infrastructure, but are still free for you to use, so you may not see the credit balance on all of your invoices
Program Benefits Overview	Our program offers a combination of usage credits and product discounts to help you scale: Usage-Based Credits: Applied to Compute & AI (Workers/AI/KV/Vectorize), Storage (R2/Images/Stream), and Performance (Cache Reserve). <i>Note: Specific caps apply to Workers AI (\$50k), R2 (\$10k), and Cache Reserve (\$10k).</i> Subscription Discounts: Enjoy 100% off fixed-cost products such as Load Balancing, Workers Paid, Images/Stream bundles, and our core Security suite (CDN/DDoS). Feature Activation: Certain advanced tools, such as SSL for SaaS, Rate Limiting and Advanced Certificate Manager, may appear "Locked" in your dashboard. Simply email us, and we'll activate these for you.
Any tips?	Speed & Performance: Enable Pro features like Polish and Mirage that speed up your site's image delivery, mobile traffic, and more. Analytics: Cloudflare visualizes the metadata collected by our products in the Cloudflare dashboard. Refer to Types of analytics for more information about the various types of analytics and where they exist in the dashboard. - Perform a speed test using Cloudflare's Speed Test and check your security insights with Cloudflare's Security Insights tool.
Need help?	As a startup customer, you have access to our prioritized support ticket system. If you submit a support ticket and need a faster follow-up, feel free to share the ticket number with us, and we'll help escalate it internally. You can also connect with other developers, product managers, and engineers in the Cloudflare Developers Discord. The Cloudflare Community is another great place to ask questions, share knowledge, and find solutions.

Important Program Terms

Please review all terms and conditions for [Cloudflare](#) and the [Cloudflare for Startups program](#). Key points to note:

- Cloudflare Registrar purchases (i.e. domain names) are **not** covered by the startup credits and must be paid in full by your payment method on file.
- There is a **\$50,000 USD** limit for Workers AI (up to \$50,000 for open source models. For partner models, standard pricing and rates **apply**), **\$10,000 USD** limit for R2, and **\$10,000 USD** limit for Cache Reserve services under your credits. A member of the Cloudflare team may reach out if you begin to approach or exceed this limit

Some Cloudflare features will always remain free, even after you graduate from the Startup Program. You can learn more about those benefits [here](#).

Thank you for being a part of the revamped Cloudflare for Startups Program, we can't wait to see what you build!

Best,
The Cloudflare for Startups Team
